ViCloud

Acoustic Islands designed for public space sound control

ViCloud is an innovative product made from Vicoustic Tech Foam and covered with fabric. It's acoustic performance is excellent at mid and high frequencies absorption, making it an efficient and aesthetically pleasing solution for loud public spaces.

ViCloud is easily suspended from the ceiling and, with adjustable height, it is suitable for home theatres, restaurants, hotel conference rooms and lobbies.

Available Fabric Colors

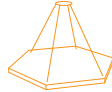

Vicloud Square

Vicloud Petal

Vicloud Hexagon
