VicCeiling

Acoustic treatment for T-bar systems

Made with EuroClass B PET Wool, VicCeiling offers a simple and light solution to reduce noise levels inside any space. VicCeiling was developed to replace the traditional and dull gypsum boards commonly used on suspended t-frame ceilings. By replacing these common tiles with VicCeiling panels, the acoustics of the space will be dramatically improved. All this with a quick and easy application. VicCeiling tiles are made of EuroClass B PET Wool compressed and shaped in multiple designs to match everyone's taste. It is compatible with all sizes of standard t-frames. It has 8 units per box.

 11 Different Patterns and 8 Fabric Colors Available*

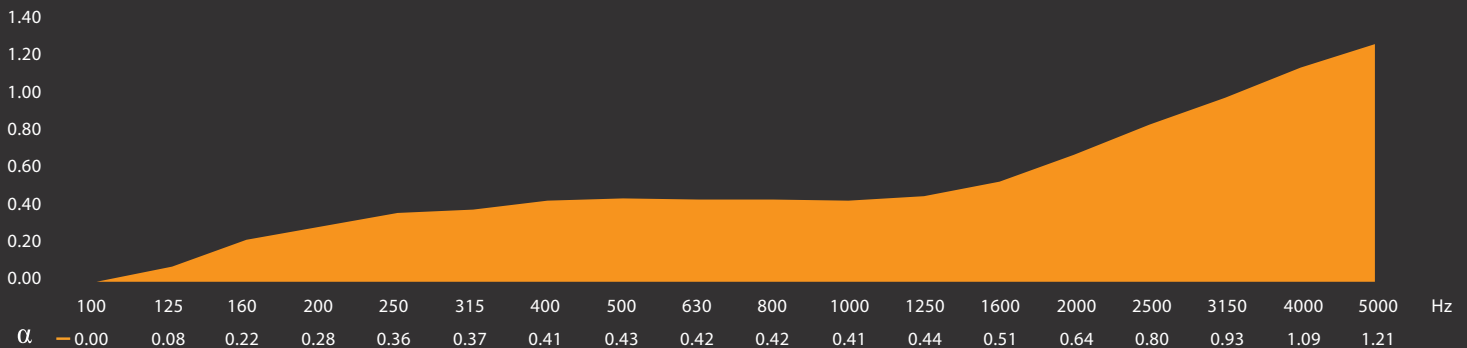

Fire rated:
Euroclass B
